Key Insights			
Lead volume declined by 20% in 2025 compared to 2024.			
Admissions increased by 29% despite lower lead generation.			
Conversion rate improved significantly from 3.55% to 5.76% (+62%).			
Cost per enrollment reduced by 36%, indicating improved enrollment economics.			
Funnel efficiency was the primary driver of performance improvement in 2025.			

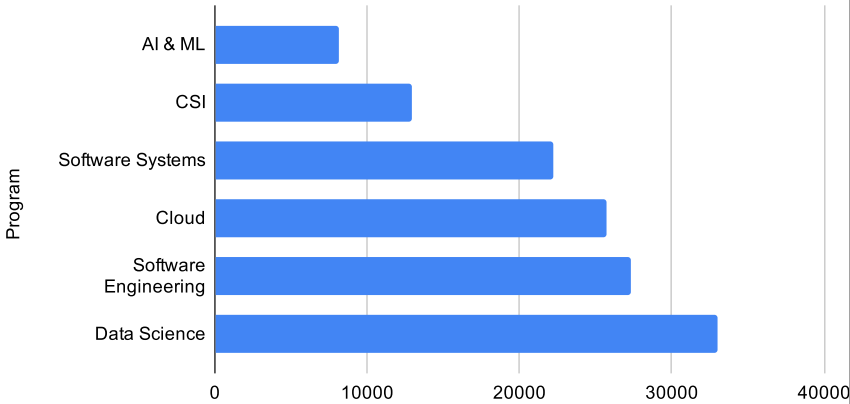

Executive Recommendations			
Continue investing in conversion optimization initiatives.			
Focus on improving lead generation while maintaining current conversion levels.			
Scale programs demonstrating strong enrollment economics.			
Review programs with high enrollment costs and weak conversion performance.			
Replicate successful 2025 funnel strategies across underperforming programs.

Cost Per Enrollment by Program

Lower is Better

Conversion Rate by Program

Key Insights

• Admissions increased by 29% despite a 20% drop in leads.

Executive Recommendations

• Increase investment in AI & ML.

• Conversion improved from 3.55% to 5.76% (+62%).		• Scale CSI through controlled budget expansion.		
• Cost per enrollment reduced by 36%.		• Improve conversion funnel for Cloud and Software Systems.		
• AI & ML is the portfolio growth engine.		• Revisit positioning for Software Engineering.		
• Data Science & Engineering requires immediate intervention.		• Review funnel effectiveness for Data Science & Engineering.
